

UAI301 Object Oriented Programming

Lab Assignment 1

Topic: Basic Input, Output, Variables, and Arithmetic Operations

Question 1: Printing Text

Write a Python program to display the following information on the screen:

- Your Name
- Department
- College Name

Question 2: Arithmetic Operations

Write a Python program to display the results of the following arithmetic expressions:

- 15×6
- $45 - 18$
- $24 + 36$
- $81 \div 9$

Question 3: Using Variables

Write a Python program that stores the following details in variables and displays them.

- Student Name
- Branch
- Semester
- University Name

Sample Output

Name: Rahul Sharma

Branch: CSE

Semester: 3

University: ABC University

Question 4: Basic Mathematical Calculations

Write a Python program to display the results of the following operations:

- $125 + 75$
- $200 - 85$
- 18×12
- $144 \div 12$

Question 5: Accepting User Input

Write a Python program to accept the user's name from the keyboard and display it on the screen.

Sample Output

Enter your name: Aman

Aman

Question 6: Greeting the User

Write a Python program that accepts the user's name and displays a welcome message.

Sample Output

Enter your name: Priya

Welcome Priya

Question 7: Addition of Two Numbers

Write a Python program to input two integers from the user and display their sum.

Sample Output

Enter first number: 15

Enter second number: 20

Sum = 35

Question 8: Employee Information

Write a Python program to accept the following details from the user:

- Employee Name
- Years of Experience
- Department

Display all the entered information in a neat format.

Sample Output

Employee Name: Amit

Experience: 5 years

Department: AI

Practice Questions:

Question 9

Write a Python program to display your:

- Name
- Father's Name
- Roll Number
- Branch
- Semester using variables.

Question 10

Write a Python program to accept the following details from the user:

Name, Roll Number, Branch and Semester. Display all the information using the print() function.

Question 11

Write a Python program that accepts two numbers from the user and displays:

- Sum
- Difference
- Product
- Quotient

Question 12

Write a Python program to accept your favorite programming language as input and display the message:

My favorite programming language is Python.

(Replace **Python** with the user's input.)

Question 13

Write a Python program that accepts the student's name, branch, semester, and CGPA from the user and displays all the details in the following format:

***** Student Details *****

Name : _____

Branch : _____

Semester : _____

CGPA : _____

Question 15

Write a Python program to accept three numbers from the user and display:

- Sum
- Average
